Special operating conditions or restrictions:

- 1 The authority granted herein is subject to the condition that the field intensity from the licensee's transmitter shall not exceed 68 mV/m as measured at the Federal Communications Commission's Waipahu, Hawaii monitoring station. In the event of interference to monitoring, direction finding, or related operations at the Federal Communications Commission's Waipahu, Hawaii monitoring station caused by either harmonic or spurious radiation, the licensee shall take such immediate corrective action as is necessary to eliminate the interference. This shall include responsibility for furnishing, installing and adjusting transmitter filter circuits, shielding, or other corrective devices. If these measures fail to eliminate interference to FCC operations caused by the presence of the licensee's signal, or if the field intensity exceeds 68 mV/m, the licensee shall immediately reduce power to the extent necessary to eliminate the interference and to comply with field limit. After determining this lower power level, the licensee shall immediately apply for a Special Temporary Authority (STA) and shall file an application to the Commission for the altered parameters.
